Level 1 — Easy **power (E)** — Number

✓ Submitted

Problem: Write a program to calculate the power of a number. The base and exponent are entered by the user.

Sample Input:
Enter base: 2
Enter exponent: 3

Sample Output:
2^3 = 8

Test Cases:
===TEST CASE 1===
Input:
Enter base: 2
Enter exponent: 3
Expected Output:
2^3 = 8

===TEST CASE 2===
Input:
3
2
Expected Output:
3^2 = 9

===TEST CASE 3===
Input:

QUESTIONS

Q1 ✓
Scenario Based - 1. Electric Vehicle Battery Manufacturing System
25 marks

Q2 ✓
Scenario Based - 2. Smart Grid Power Distribution System
25 marks

Q3 ✓
Scenario Based - 3. A pharmaceutical company manufactured 2,50,000 vaccine doses in 2026
25 marks

Q4 ✓
Scenario Based - Airport Passenger Security Screening System
25 marks

4/4 answered

Q1 Scenario Based - 1. Electric Vehicle Battery Manufacturing System

25 marks

An electric vehicle battery manufacturing company produced batteries from January 2026 to December 2026. Each month, the target production is 5,000 batteries. If production exceeds the target, the company receives a 10% performance incentive. If production is below 80% of the target, the production unit is marked for inspection.

A) Develop a C program using arithmetic operators to calculate the annual production, average monthly production, and production efficiency. Use decision-making statements to determine the incentive and inspection status.

B) Use looping constructs to process production details for all 12 months. Use continue to skip months with invalid production values and break if the plant shuts down due to equipment failure.

Your Code

```
1 #include <stdio.h>
2
3 int main() {
4     int monthlyProduction[12];
5     int month;
6     long int annualProduction = 0;
7     float averageProduction = 0.0, efficiency = 0.0;
8     int target = 5000;
9     int validMonths = 0;
10    char equipmentFailure;
11
12    printf("Enter production details for each month (Jan-Dec):\n");
13    printf("(Enter -1 for invalid data, 9999 to simulate equipment failure)");
14
15    for (month = 1; month <= 12; month++) {
```
